

2010 SUMMER DAY CLASSES

AVIATION HISTORY

This is your opportunity to learn about the history of aviation, from the Wright brothers to the stealth bomber! We will travel back in time to fly like Orville and Wilbur Wright with our 1902 Wright Glider simulator. Then we'll discuss what makes an airplane go. You will also construct your own paper airplane and run test flights through the halls of the museum.

Dates: June 15, July 21 or August 4

SPACE TRAVEL

Learn what it is like to be working and living in space. What do astronauts eat? How do they move? What experiments do they do? We will answer these questions and more! Discover rockets and their blast-off power. You might even take a trip through the Milky Way!

Dates: June 23, July 7 or August 18

CAREERS IN AVIATION AND SPACE

Explore the endless possibilities of careers in aviation and space. What does it take to be a pilot, air traffic controller, aerospace engineer, flight attendant, astronaut or meteorologist? Try your hand as a ground crew member getting an airplane out of the gate and on its way!

Dates: June 17, July 14 or July 28

IWASM CAMP CLASS REGISTRATION AND INFORMATION

Members(including Kid's Club): \$8 per class or \$20 for all three
